

PRESS RELEASE

CEO survey kicks off in the lead-up to the 2nd InvestGR Forum 2019

Athens, 29 November 2018 | What do foreign multinationals propose to improve Greece's investment framework?

To answer this question, foreign multinational companies active in Greece are now submitting their proposals to the InvestGR team, as part of the lead-up to the 2nd InvestGR Forum 2019: Foreign Investments in Greece, to be held 11 June 2019.

These proposals will form the basis for a Top-10 List of interventions to improve the attractiveness of Greece as an investment destination. The final document will be drafted by George Pagoulatos, Professor of European Politics and Economy of the Athens University of Economics and Business, and will be presented at the Forum in June.

This set of proposals is a follow-up to "The Initiative for Foreign Investments in Greece," which was also produced under the editorial supervision of Professor George Pagoulatos and presented last July at the 1st InvestGR Forum 2018: Foreign Investments in Greece. "The Initiative" was distributed to the political leadership of Greece, the media and the institutions of the European Union.

About the InvestGR Forum

InvestGR is the Forum for constructive dialogue between C-level executives of foreign companies operating in Greece and key representatives from the political, institutional and academic spheres.
